Matrox Extio Series

Thank you for purchasing a Matrox Extio product. This product is a complete remote graphics solution that supports up to two computer monitors at a time. As a remote graphics solution, it separates the CPU and hard disks of your system from the computer peripherals – monitors, keyboard, mouse, and audio hardware.

Hardware required (sold separately)

To connect your Matrox product to your system, you need an LC-LC optical cable. For more information on the type and distances supported, see “Hardware information” in your user guide.

More information

See the Matrox Web site (**www.matrox.com/graphics**) for the latest Matrox documentation, software, and product information.

Documentation

See your user guide for information on other installation and connection options. The user guide for your product is available on the Matrox Web site (**www.matrox.com/graphics/en/support/manuals**).

Matrox software

Matrox software is available for your Extio product on the Matrox Technical Support Web site (**www.matrox.com/graphics/support/drivers**).

For software information, see the Matrox PowerDesk help and *Readme* files. Be sure to check for any last-minute release notes included with your product.

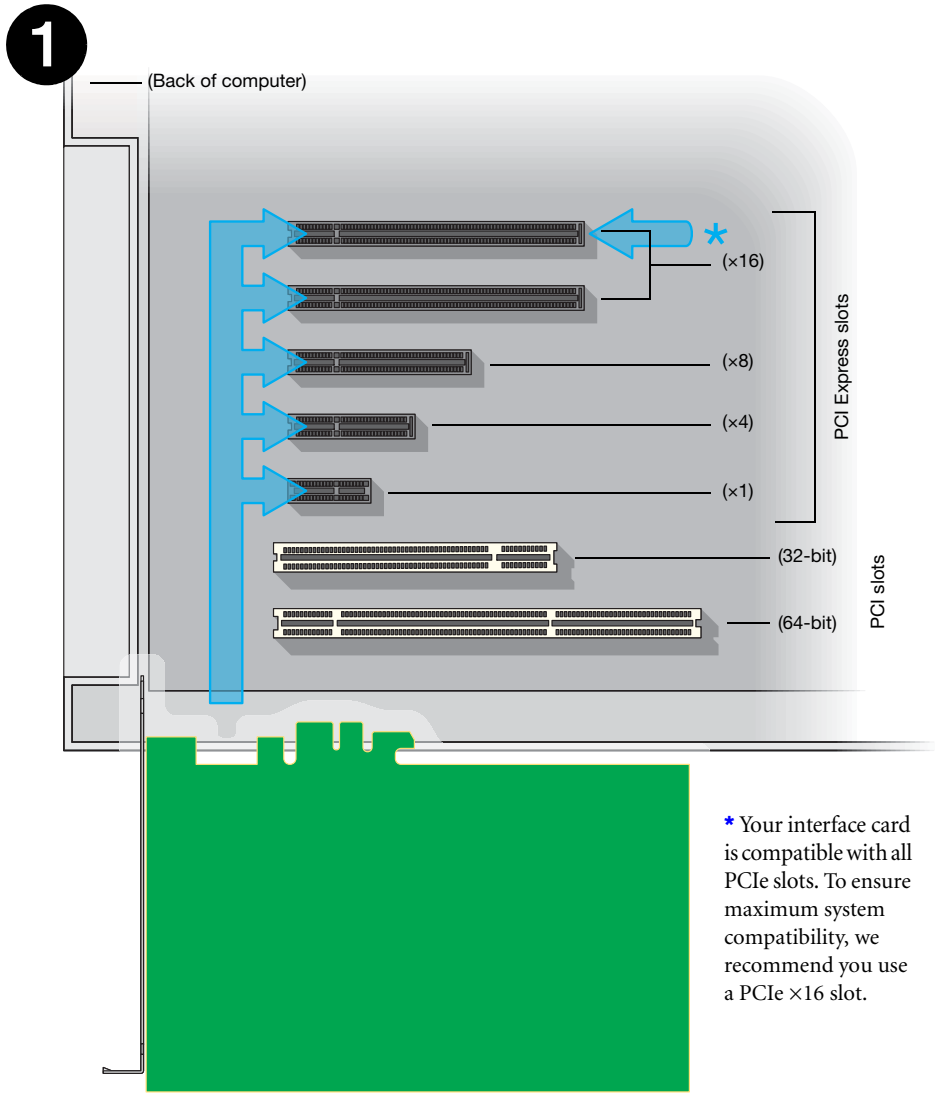
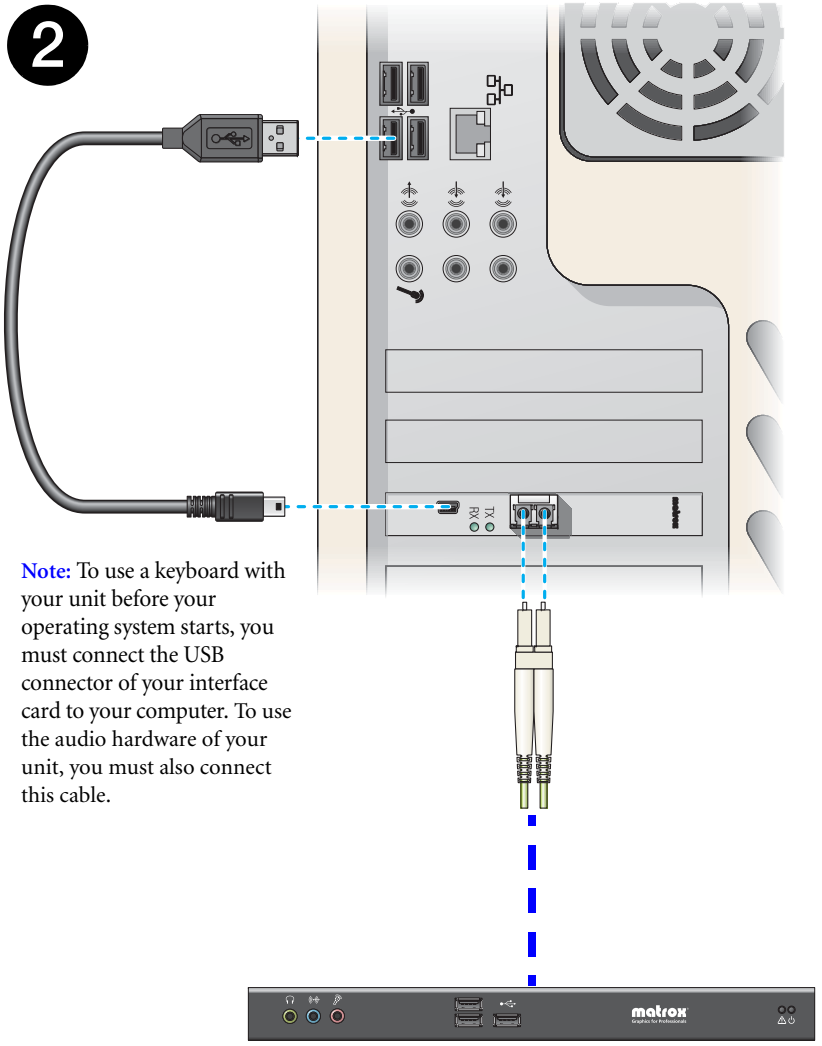
❶ Install and ❷ connect your interface card

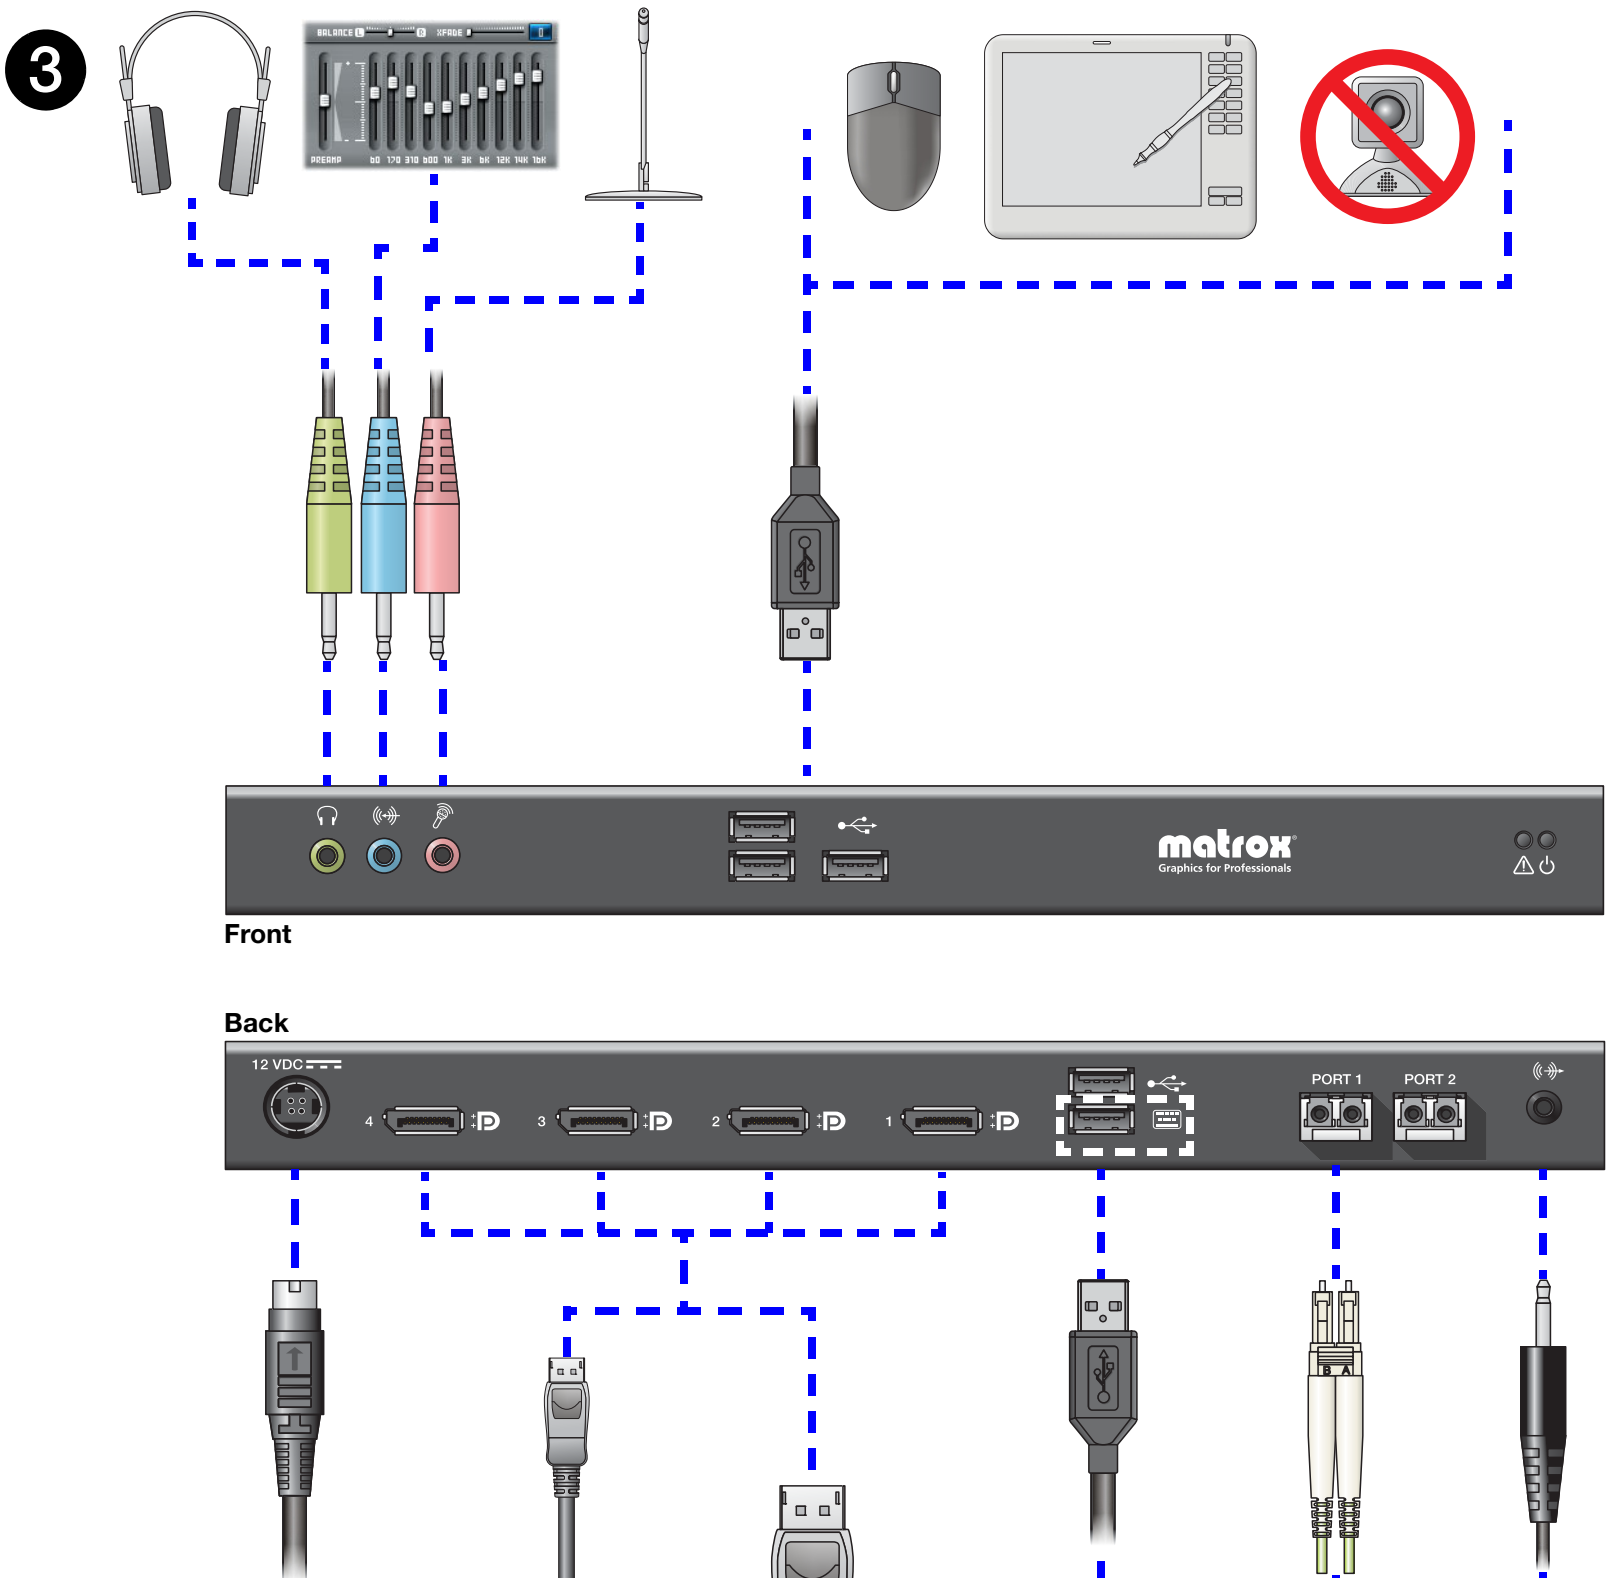


* Your interface card is compatible with all PCIe slots. To ensure maximum system compatibility, we recommend you use a PCIe ×16 slot.



Note: To use a keyboard with your unit before your operating system starts, you must connect the USB connector of your interface card to your computer. To use the audio hardware of your unit, you must also connect this cable.

❸ Connect your Extio unit



❹ Download and install your software (www.matrox.com/graphics/support/drivers)
